Re: U.S. Patent 6,730,230 B2, Issued May 4, 2004,
engendered by U.S.S.N. 10/043,471; Filed January 11, 2002
Entitled: "Use of High Density Microparticles for Removal of Pathogens"
Our File No. 463370-41

Dear Examiner Reifsnyder:

I enclose herewith a proposed *Certificate of Correction*, for the above-identified U.S. Patent.

Pursuant to 35 U.S.C. §254, this *Certificate* proposes to correct an Office oversight made during the printing of the patent. The Office oversight consists of a failure to include a paragraph break where the *as filed* specification had originally indicated.

Pursuant to 35 U.S.C. §255, this *Certificate* also proposes to correct several other clerical and typographical mistakes of minor character, which mistakes were *not* the fault of the Office. Those minor mistakes consist of doubled words and spelling errors. These mistakes were obviously made in good faith, do not constitute new matter, and would not require reexamination.

Thank you for your attention to this matter.

Very truly yours,
